Thurs
3-29-12

My name is Marzia Marlon I was moved from cardwell county about three months ago and moved to Lexington MO. When I was at cardwell I received visits from my family every weekend. When I went in front of you I was told you would help make sure I got my visits. My wife's days of work are on Thursdays and I had 3 visits since I've been here. My wife has recently been promoted and will not be able to visit my anymore. Because my visits are from 2:45 to 3:00 visits here are over at 11:00 pm she does not get off until 5:30 pm. My family is that keeps me going. In this time of need, for me for them it helps to see that I'm doing well and it does the same for me. This fifteen months of being away from them have been terrible. I also can't call home as often because the calls are so high. I also have concern about my Medical here. It took two months for me to start getting my meds that I was receiving at the other jail.

My back and knee have been hurting
and I put a med course in. It
took two weeks for me to see
doctor. When I seen the doctor all
he did was ask what was wrong
I told him all he did was put
me on meds. Did not look my
over did even make eye contact
with me. The meds he gave me
are the same meds he gives everybody
here. The pain back is still there
and my knee. The meds are making
me depressed. Making my head hurt
and upsetting my stomach. Please I
I need to go some were I
can get a better doctor to check
me over. To see whats wrong with
my back and knee. This concerns
are real I do not want you think
I'm doing this for attention I have
7 months to go before my court date
My concerns for my health and
my concerns to my kids, this
are real. Thank you
